CryptonHero

Innovation With a Mission

Digital Assets Powering Philanthropy at a Global Scale

Every digital asset tells a story of meaning — and each new owner keeps it alive.

Crypton Hero White Paper

Executive Summary

Crypton Hero (CH) is a next-generation Web3 application designed to transform digital assets—NFTs, digital art, memorabilia, and more—into engines for continuous, meaningful social impact. At the core of CH is a simple promise: every transaction conducted within the platform results in a real contribution to a verified nonprofit or mission-driven cause. Rather than relying on one-time campaigns or isolated donations, CH establishes a dynamic ecosystem where giving is seamlessly built into every digital asset transaction—making perpetual philanthropy a reality.

How It Works

The CH platform enables nonprofits, creators, and organizations to mint and manage digital assets whose sale and resale naturally channel support to verified causes. With each transaction, a share is set aside to benefit missions that matter—ensuring that positive impact flows consistently, every time ownership changes hands.

Market Fit

CH addresses a critical gap in the Web3 and social impact space: most platforms limit giving to one-off events or depend on creators to enable donations. CH's model ensures that every participant, from collectors to creators, is actively involved in a system where positive impact is built into the exchange itself. With crypto-based giving projected to exceed $2.5B in 2025[1] [2], and digital-native donors seeking greater accountability, CH is uniquely positioned at the intersection of transparency, seamless user experience, and scalable social impact.

What Makes It Different

No Direct Competitor: No other platform empowers nonprofits and creators to mint digital assets with perpetual support for causes embedded directly into every transaction, all within a purpose-driven metaverse.[3]

Triple Value Proposition

- Creators amplify their mission and credibility.
- Collectors gain exclusive assets with lasting legacy and social contribution.
- Causes benefit from continuous, borderless support—woven into every interaction.

Community & Brand Arc

Crypton Hero is more than just a Web3 platform—it's a living movement, fueled by purpose, powered by community, and focused on good. At the heart of our mission is the Crypton Hero persona: an evolving symbol that embodies collective action, creativity, and the spirit of digital impact. As users engage, collect, and create within the ecosystem, they're not just acquiring digital assets—they're joining a global community that stands for something bigger. Every contribution, every interaction, and every asset is part of a narrative that moves the world toward lasting good.

Go-to-Market & Ecosystem Growth

Crypton Hero is a fully operational U.S. C corporation and a real company, not just a concept. The project features a live, near-market-ready Web3 application currently operating on the Ethereum testnet, demonstrating both functionality and commitment to launch. With over $550,000 in prior capital and an active development roadmap, Crypton Hero is well positioned for public rollout.

Community engagement will be driven through the platform's utility tokens and exclusive digital assets (Founders Club NFTs), establishing strong, early incentive alignment among creators, collectors, and causes. These limited-edition membership NFTs offer early supporters enhanced access, platform perks, and recognition as founding members of the Crypton Hero movement (see "Founders Club NFT Community Access").

Vision

CH's mission is to create a borderless, transparent, and interactive network for digital social impact—evolving from a utility-driven Web3 application into a vibrant, purpose-driven metaverse where giving is ongoing, deeply integrated, and inseparable from the experience of digital ownership.

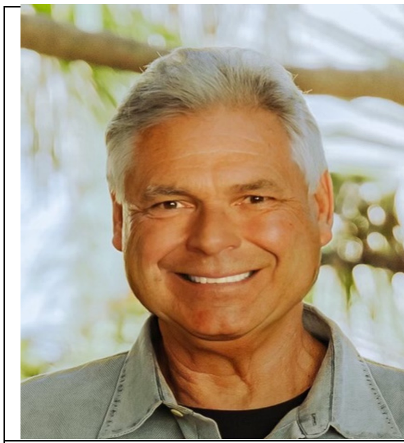
[2] Giving Compass, Crypto Donations Expected to Double in 2025.

[3] Comparative analysis based on:

- NFTNow.com, "Where Top NFT Marketplaces Stand on Creator Royalties" (2025 update); confirms platforms like OpenSea and Blur allow creator royalties but do not provide automated resale-based donations to causes.
- TIME, "How Crypto is Funding Ukraine's War Effort" (2022–2024); details one-off NFT fundraising events without reusable infrastructure or perpetual giving models
- These sources, in context with Crypton Hero's 2025 onboarding deck, support the assertion that no direct competitor currently offers an integrated, resale-driven donation platform for verified causes.

Team & Leadership

Led by vision – driven by Purpose

Doug Williams **Chief Executive Officer** Doug has over two decades of leading successful startups and tech ventures. His proven expertise in scaling innovative products drives both strategy and execution.	**Serge Yeterian** **Marketing Lead** Serge Yeterian is a strategist and seasoned entrepreneur who transforms bold ideas into standout brands. He blends storytelling, design, and data to craft campaigns that drive growth and spark real connection.	**Brad Harris** **Vice President Technology** With over 40 years of experience, Brad has a strong focus, extensive background, and proven track record in software design/development, web services & information security. He has a proven track record of building secure web applications solutions

Introduction & Market

The Evolution of Digital Giving and Blockchain Philanthropy:

Philanthropy is undergoing a transformation. As digital culture and blockchain technology accelerate, new models are emerging that empower individuals and organizations to support causes with greater transparency, trust, and global reach. Crypton Hero stands at the forefront of this shift, purpose-built to unlock lasting social value in every digital transaction.

The Web3 Giving Opportunity

In 2025, crypto-based giving is projected to exceed $2.5 billion[1] [2], as a new generation of digital-native donors and mission-driven creators fuel rapid growth in the sector. Over 70% of leading U.S. charities now accept digital assets, reflecting the growing demand for accessible, borderless philanthropy. [3] Yet, despite headline-grabbing NFT fundraisers and rising adoption, most current efforts remain limited—often constrained to one-off events, short-term campaigns, or platform partnerships that lack enduring infrastructure or recurring support.

Why Crypton Hero?

Crypton Hero meets this moment with a unique approach: every transaction, not just the initial sale, supports a verified cause—seamlessly, transparently, and on an ongoing basis. This model aligns the interests of creators, collectors, and nonprofits, making purpose-driven digital assets the foundation for lasting, real-world change. With no direct competitors enabling recurring, built-in giving through resale activity and a metaverse-native experience[4], Crypton Hero is positioned to set a new standard for digital philanthropy.

[2] Giving Compass, Crypto Donations Expected to Double in 2025.

[3] Giving Compass, "Crypto Donations Expected to Double in 2025" (2025).

[4] Comparative analysis based on:

- NFTNow.com, "Where Top NFT Marketplaces Stand on Creator Royalties" (2025 update); confirms platforms like OpenSea and Blur allow creator royalties but do not provide resale-based donations to causes as a core feature.
- TIME, "How Crypto is Funding Ukraine's War Effort" (2022–2024); details one-off NFT fundraising events without reusable infrastructure or perpetual giving models.
- These sources, in context with Crypton Hero's 2025 onboarding deck, support the assertion that no direct competitor currently offers an integrated, resale-driven donation platform for verified causes.

Problem Statement

The Gaps in Today's Philanthropy and Web3 Models:

Despite all the innovation in digital giving, most existing solutions are still built around the limitations of legacy approaches.

- One-Time Impact: NFT drops and crypto donations typically deliver support to a cause only at the point of initial sale, leaving no mechanism for continued benefit as assets change hands.
- Lack of Transparency and Recurring Value: Contributors, collectors, and organizations often lack visibility into the ongoing impact of their participation. There's no reliable way to know if resales benefit the mission—or if the momentum fades after launch.
- Barriers for Nonprofits and Creators: Technical and regulatory hurdles prevent many organizations from accessing Web3's potential, while creators have few compliant, credible paths to tie their work to meaningful, ongoing impact.

A Need for Perpetual, Purpose-Built Infrastructure

Web3's true promise lies in creating ecosystems—not just events—where positive change is woven into every transaction. The market needs more than donation widgets and one-off charity collections; it needs a platform where continuous giving is a native feature, and where the roles of creator, collector, and cause are united by shared value and transparent participation.

Crypton Hero's Solution

Crypton Hero directly addresses these gaps by embedding support for verified causes into every digital asset transaction, delivering an experience where every participant helps drive continuous, measurable impact. By lowering technical barriers, simplifying compliance, and focusing on mission over speculation, Crypton Hero unlocks the true power of Web3 for good.

The Crypton Hero Ecosystem

By embedding philanthropy directly into the mechanics of digital asset ownership and exchange, Crypton Hero establishes a new model for sustained, community-driven impact. This solution is not just infrastructure—it's a movement, setting a higher bar for transparency, inclusivity, and measurable good in Web3.

Crypton Hero launches as a next-generation Web3 platform dedicated to purpose-driven digital assets and continuous philanthropy—with the vision to grow into an immersive metaverse. As the platform evolves, the Crypton Hero brand ambassador and guiding character will also become the interactive persona within the metaverse experience.

Crypton Hero delivers a first-of-its-kind ecosystem where every digital asset transaction powers ongoing, integrated philanthropy—making continuous giving a core feature, not an afterthought.

Built-In, Perpetual Giving—By Design

At the heart of Crypton Hero is a simple but powerful innovation: every time a digital asset is bought, sold, or resold on the platform; a share of the transaction value is directed to a verified cause. This is not a voluntary opt-in or a one-off campaign—it is a persistent, smart contract-based mechanism designed so that real-world impact is linked to every asset's lifecycle. This ongoing funding stream, woven into the platform's smart contract architecture, helps ensure that support for causes continues for as long as the asset remains active within the ecosystem.

Direct Empowerment for Nonprofits and Creators

Unlike traditional NFT or donation platforms that rely on third parties or require technical expertise, Crypton Hero puts the power directly in the hands of mission-driven organizations and creators. Any qualified nonprofit or benefit organizer can mint, manage, and sell their own digital assets, while defining the specific cause each asset supports. Early supporters may also acquire exclusive Founders Club NFTs, which grant long-term access and recognition within the ecosystem. See "Founders Club NFT Community Access" for details. This direct model reduces friction, democratizes access to next-generation fundraising, and ensures transparency from mint to resale.

A "Triple Win" Model for Maximum Impact

Crypton Hero unites creators, collectors, and causes in a mutually beneficial ecosystem:

- Creators amplify their brand, mission, and credibility through assets with purpose at their core.
- Collectors gain rare, status-driven digital collectibles—each one a legacy of ongoing support and social value.
- Certain collectibles, such as Founders Club NFTs, also unlock platform privileges and long-term benefits.
- Causes benefit from global, real-time, and recurring funding as assets change hands, expanding reach beyond traditional donor networks.

Purpose-Driven Metaverse: Evolving Toward Immersive, Borderless Giving

While Crypton Hero launches as a next-generation Web3 platform for cause-driven digital assets, its long-term vision is to evolve into an immersive, purpose-driven metaverse. As the platform grows, the Crypton Hero persona will transcend its origins as a character—emerging as the central guide and living presence within the metaverse itself. In this role, Crypton Hero will serve as both the spirit and connective force of the ecosystem, making engagement more personal, meaningful, and mission-driven. Over time, the platform will expand to offer dynamic digital spaces where creators, organizations, and supporters can connect, launch campaigns, and drive collective impact. This future metaverse will enable richer engagement and greater flexibility—removing geographic barriers and empowering anyone, anywhere, to participate in transparent, decentralized philanthropy.

At launch, users can mint, collect, and support cause-linked digital assets and join a growing community unified by mission and technology. As the ecosystem matures, Crypton Hero is committed to building new ways for supporters to engage and make a difference—setting the stage for a truly borderless, interactive giving environment.

Automated Compliance and Security

Crypton Hero is built with a commitment to compliance, transparency, and user safety. At launch, the platform will introduce straightforward KYC and AML protocols designed to provide a baseline of trust and accountability for all participants. As Crypton Hero evolves, these compliance features will adapt and expand to align with best practices and changing regulatory expectations—ensuring that security and responsible participation remain at the core of the user experience. Every feature, from digital asset minting to resale royalties, is designed to meet the highest standards for legal and regulatory alignment, while maintaining an accessible and inclusive user experience.

Key Features

- Continuous Giving: Every asset resale results in a new allocation for verified causes—no manual steps or ongoing admin burden required by participants.
- Global Reach: Nonprofits and creators can raise funds and build communities without borders.
- Easy Onboarding: Nonprofits and mission-aligned creators get simple, guided tools to mint and manage their assets and campaigns.
- - Transparent Impact: Donors, collectors, and organizations can verify contributions and follow the journey of each asset on-chain.
- - Integrated Utility: Digital assets offer both emotional and practical benefits, from access to exclusive experiences to community rewards—further amplifying their value.

Competitive Landscape & Differentiators

The landscape for digital philanthropy remains largely defined by legacy models—one-time NFT campaigns, donation widgets, and platforms built for other purposes. To date, no platform has fully integrated perpetual, cause-linked giving into every asset transaction, nor empowered nonprofits to directly mint, manage, and benefit from their own digital assets within a transparent, compliant, and purpose-driven ecosystem. Crypton Hero stands at the forefront of this evolution, setting a new standard for sustainable digital giving.

Market Gap: The Need for Continuous, Purpose-Built Impact

Today, nearly all attempts at Web3 philanthropy remain limited to one-off NFT drops or basic donation tools—none offer a dedicated, compliant platform for continuous, cause-linked support. No system exists where nonprofits can directly mint, manage, and benefit from their own digital assets with built-in, perpetual giving at the core.

Crypton Hero addresses this unmet need by embedding ongoing, cause-linked giving directly into the fabric of every digital asset exchange. Through a compliant, smart contract-based mechanism, every transaction—initial sale and resale alike—provides a transparent, auditable flow of support to verified nonprofit partners. This persistent funding stream is a key differentiator in the sector, supporting causes not just once, but for as long as the asset remains active within the ecosystem.

Key Points of Differentiation

- Direct Empowerment: Crypton Hero provides nonprofits, benefit organizers, and creators with direct access to mint, sell, and manage their own digital assets, removing the need for intermediaries or complex technical barriers.
- Perpetual, Embedded Support: A smart contract-based mechanism ensures that a share of every transaction—both initial sale and each resale—supports verified causes, making ongoing impact a fundamental feature rather than an afterthought.
- Purpose-Driven Metaverse Vision: While launching as a Web3 platform, Crypton Hero is designed for expansion into an immersive metaverse where engagement, identity, and giving are deeply integrated. Over time, the Crypton Hero persona itself will evolve into the interactive guide and connective tissue of this digital ecosystem.
- Transparent and Compliant: Every transaction is recorded on-chain, providing real-time auditability and accountability for all stakeholders. Compliance and user protections—including evolving KYC and AML measures—are built into the platform's core, and will adapt as the regulatory landscape matures.
- Triple Value Proposition: The platform is engineered for a three-way win—creators amplify their purpose and social capital, collectors acquire rare assets tied to legacy and impact, and causes benefit from continuous, borderless funding.

Comparison With Other Platforms

A review of the leading solutions in the market underscores Crypton Hero's unique positioning:

- \- The Giving Block, Every.org, Engiven, BitGive: These platforms primarily facilitate cryptocurrency donations to registered nonprofits or provide infrastructure for accepting crypto as a payment method. They do not empower organizations to mint and sell digital assets directly, nor do they embed recurring support into NFT or asset resale transactions.
- \- Cryptograph: Allows creators to donate a portion of NFT sales—including royalties—to charity, but is focused on creator-driven initiatives and does not provide nonprofit organizations with direct control over asset minting, management, or fundraising narrative.
- \- The Sandbox, Decentraland: These are general-purpose metaverse platforms with occasional philanthropic events or NFT sales for good causes. However, they are not purpose-built for charity, and do not feature native, compliant mechanisms for ongoing, perpetual giving to causes from all asset resales.
- \- NFT4Good: Represents a one-off NFT fundraising initiative for a specific cause. While innovative, it lacks the infrastructure and vision for a continuous, self-sustaining ecosystem that supports multiple causes, creators, and campaigns over time.

Summary Table: Platform Comparison

Platform	Direct Minting by Nonprofits	Recurring Support on Resale	Purpose-Built for Philanthropy	Integrated Metaverse Vision	Compliant, On-Chain Transparency
Crypton Hero	Yes	Yes	Yes	Yes	Yes
The Giving Block	No	No	Partial	No	Yes
Every.org/Engiven	No	No	Partial	No	Yes
Cryptograph	Partial	Partial	No	No	Yes
The Sandbox	No	No	No	Yes	Partial
Decentraland	No	No	No	Yes	Partial
NFT4Good	No	No	Partial	No	Partial

Setting a New Standard

By focusing on ongoing, transparent, and directly managed digital philanthropy, Crypton Hero fills a critical gap in the Web3 landscape. Its combination of direct nonprofit empowerment, perpetual giving, integrated compliance, and a forward-looking metaverse vision sets a new standard for how impact, technology, and community can come together—responsibly and sustainably.

Product Overview — Crypton Hero Web3 Application & Metaverse

Crypton Hero is a purpose-built Web3 platform designed to make digital philanthropy accessible, transparent, and rewarding for everyone. The application empowers three primary user groups—causes, creators, and collectors—to connect, fundraise, and drive perpetual impact through blockchain-enabled digital assets.

User Journey: Causes, Creators, and Collectors

- • Causes: Charities and impact organizations benefit from real-time, borderless funding and perpetual revenue streams, receiving a portion of every sale and resale. Automated dashboards ensure full transparency and instant reporting.
- • Creators: Nonprofits, social enterprises, benefit event hosts, and mission-driven individuals can mint and manage digital assets that directly support their work. With intuitive creator tools, launching campaigns, auctions, and exclusive drops requires no technical expertise.
- • Collectors: Supporters and buyers can acquire unique assets—artwork, memorabilia, experiences, or badges—knowing each purchase and every future resale automatically fuels a verified cause. Collectors earn digital status, community recognition, and exclusive benefits, while advancing global impact.

How the Platform Works: Minting, Buying, Reselling, and Continuous Giving

- Creators mint assets and designate supported causes.
- Collector's purchase using crypto or supported payment methods.
- On every resale, smart contracts allocate a fixed royalty to the selected cause(s)—and, where applicable, the original creator and collector.
- Transparent dashboards track funds generated, assets in circulation, and cumulative impact.

Platform Features & User Experience

- Self-Serve Onboarding: Intuitive flows for creators, collectors, and causes.
- Digital Asset Management: Mint, promote, list, and manage assets in just a few clicks.
- Impact Dashboards: Live insights into funds raised and ongoing contributions.
- Borderless Transactions: Decentralized and globally accessible for all users.
- Compliance & Security: KYC/AML where needed, with robust protection for users and funds.

Summary

The Crypton Hero Web3 application lays the groundwork for a new era of digital philanthropy—uniting seamless digital asset management, perpetual giving, and evolving metaverse experiences. Whether you are a creator, collector, or cause, the platform is purpose-built to maximize impact and make giving an integrated part of the digital world.

For a detailed roadmap, launch phases, and milestone schedule, please refer to “Roadmap & Milestones”.

Tokenomics & Token Utility Details

Crypton Hero Utility Token (CHT) Overview

The Crypton Hero Token (CHT) is a fixed-supply digital utility token built on the Ethereum blockchain (ERC-20 standard). CHT is designed to enable access to core features and enhanced experiences within the Crypton Hero Web3 application and its expanding ecosystem. Users may utilize CHT to unlock platform tools, participate in community incentives, and engage with specialized services offered by Crypton Hero.

CHT is provided solely for use within the Crypton Hero environment. Ownership of CHT does not confer any rights to company equity, profits, dividends, or voting privileges, and the token is not intended for investment or speculative purposes. No statements herein should be interpreted as an offer or promise of financial return, future value, or resale potential.

Use of CHT is governed by the platform’s terms of service, and participation may require identity verification in accordance with applicable KYC/AML policies.

Compliance Statement

CHT tokens are issued exclusively for utility purposes within the Crypton Hero platform. They do not represent an investment, and confer no ownership, profit, or governance rights. Users should not acquire CHT with any expectation of financial return. All access and use are subject to applicable laws and platform terms.

Token Supply & Allocation

The total supply of CHT is capped at 130,000,000 tokens and will never be increased. The allocation of tokens is structured to support platform utility, reward community participation, and ensure long-term ecosystem alignment.

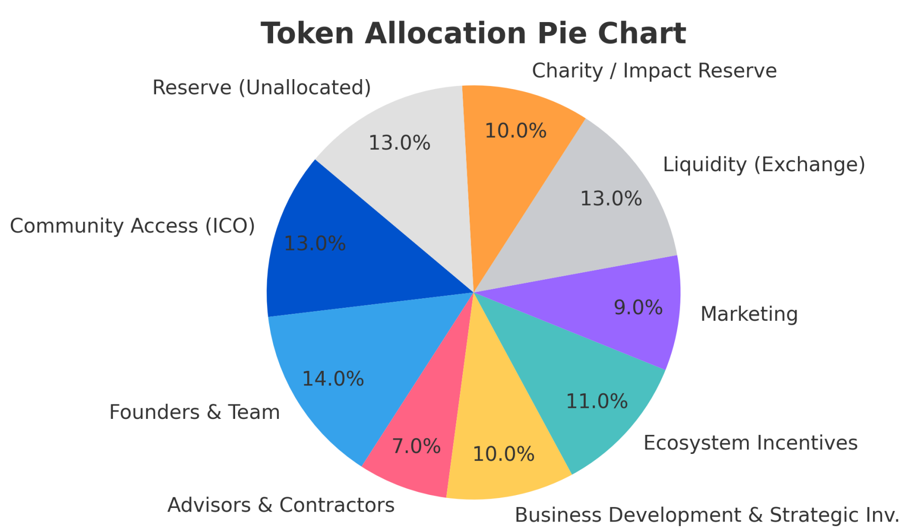
Token Allocation Breakdown:

Allocation Category	Number of Tokens	% of Total Supply	Purpose / Notes
Community Access (ICO)	16,900,000	13%	For platform users via ICO or app
Founders & Team	18,200,000	14%	Multi-year vesting; aligns with ongoing dev and ops commitment
Advisors & Contractors	9,100,000	7%	Service providers, legal, technical partners
Business Development & Strategic Inv.	13,000,000	10%	Strategic partners, integrations, and private investors
Ecosystem Incentives	14,300,000	11%	Creators, community activities, special campaigns
Marketing	11,700,000	9%	Campaigns, user education, outreach
Liquidity (Exchange)	16,900,000	13%	Exchange, DEX/CEX pools, stable utility
Charity / Impact Reserve	13,000,000	10%	Nonprofit engagement, cause rewards, on-platform impact
Reserve (Unallocated)	16,900,000	13%	For future technical needs or unforeseen events

Notes:

- Tokens in each category are for platform operation, user access, incentives, or essential service needs only. See below for a visual breakdown of the token allocation
- All participants are subject to eligibility, KYC/AML, and jurisdictional restrictions as described in “Eligibility, KYC/AML, and Jurisdictional Restrictions”.
- Certain token allocations may also be subject to vesting and lockup requirements, as set forth in “Vesting Information and Eligibility & Compliance”

Token Allocation Pie Chart



NOTE: Token Allocation Pie Chart. See the "Token Supply and Allocation Table" for numeric details and full definitions. Each allocation label matches the corresponding row in the "Token Supply and Allocation Table" for clarity and reference.

Community Access: Minting & Circulation Mechanics

The 13% of tokens allocated for community access are minted in batches aligned with designated access windows (informally structured as Tier One access, Tier Two access, and Tier Three access availability). Tokens for each window are minted only at the start of that specific phase.

At the end of each access period, any unclaimed or unused tokens remain minted and roll forward into the next access phase. Once the final public access period concludes, Crypton Hero may either (a) keep remaining tokens available for general utility access, or (b) formally close the public access pool.

In the event of closure, unsold or unclaimed tokens are returned to the platform's treasury and may be reallocated only for future utility-based purposes. These tokens will never be re-minted beyond the original 13% cap and will not be used for financial or speculative programs. All batch mints, treasury returns, and reclassifications are conducted under platform governance and publicly disclosed for transparency.

Founders Club NFT Community Access (Summary)

Crypton Hero's Founders Club NFTs represent the first early community access passes, offered in two highly exclusive editions: Founders Circle and Inner Circle. Each NFT opens the door to premium platform access, lasting "OG" recognition, and unique creator benefits—all powered by Crypton Hero's utility token ecosystem.

- Founders Circle NFTs are the most exclusive tier, available during Tier 1 token sales, granting lifetime Premier Creator access, a permanent badge within the platform, and top-tier event privileges.
- Inner Circle NFTs are available during Tier 2 token sales, offering a five-year Premier Creator membership, special digital collectibles, and early access to community events.

Both tiers are redeemed exclusively with CHT utility tokens and showcase the first real utility for the platform's tokens. Supply for each edition is strictly limited, and any NFTs not redeemed within their release window will be permanently burned—preserving lasting exclusivity and OG status for holders.

NFT holders enjoy immediate access to creator tools, commemorative digital art, and a stream of ongoing community perks—including annual loyalty token incentives (no vesting), all utility-focused and non-investment in nature.

Participation is entirely utility-driven: these NFTs are designed solely for platform access and benefits, with no rights to profit, equity, or ownership.

Vesting Information

Introduction & Purpose

Vesting is an essential mechanism for aligning the long-term interests of all Crypton Hero stakeholders. By structuring the release of allocated tokens over set periods, vesting helps ensure responsible stewardship, operational continuity, and stability for the entire ecosystem. Crypton Hero's vesting approach is designed to prevent sudden large token movements, discourage short-term speculation, and promote ongoing contribution from team members, advisors, and partners.

General Vesting Policy

All allocations outside of the community/public pool are subject to vesting schedules or controlled release mechanisms. Where vesting applies, schedules are fully disclosed, enforced via smart contracts or platform governance, and monitored for compliance. No vesting pool is fully unlocked at launch, and no category of allocation is designed or intended for financial speculation or resale advantage.

For allocation categories that are not subject to traditional vesting, Crypton Hero utilizes a batch minting process. Rather than pre-minting the full allocation for these pools, only a limited portion (typically 15–20% of the total available tokens for each category) is minted initially, with additional tokens minted in discrete batches as operational needs arise. All batch mints and distributions are conducted under platform oversight and are transparently disclosed to the community.

Detailed Vesting Schedules by Category

Founders and Team

Tokens allocated to the Founders and Team are subject to a structured, multi-year vesting schedule designed to promote long-term alignment and project stability. No tokens from this allocation are available at launch.

- **Cliff:** Six months during which no tokens are released.
- **First Release:** 15% of the total allocation distributed at cliff end.
- Ongoing Vesting: Remaining 85% released in equal installments every six months over the subsequent 30 months (five releases of 17% each).

Business Development Partners

Tokens allocated to business development partners vest over an 18-month period, commencing on the date their individual contract is signed or engagement begins. There is a 30-day cliff during which no tokens vest. Following the cliff, tokens vest in six equal quarterly installments every 90 days.

Specific terms regarding performance conditions, forfeiture, acceleration, and other contractual details will be governed by individual written agreements and are not covered in this white paper.

Strategic Investors

Tokens granted to strategic investors follow a vesting schedule identical to that of the Founders and Team.

- **Cliff:** Six months with no token release.
- **First Release:** 15% of the total allocation distributed at cliff end.
- Ongoing Vesting: Remaining 85% released in equal installments every six months over the following 30 months (five releases of 17% each).

Advisors & Contractors

Tokens allocated to advisors and contractors vest over an 18-month period, commencing on the grant or engagement start date. There is a 30-day cliff during which no tokens vest. Following the cliff, tokens vest in six equal quarterly installments every 90 days.

Ecosystem Incentives, Community, and Marketing

Tokens designated for ecosystem incentives, community rewards, and marketing are distributed based on platform milestones, campaign launches, or measured community activity. These allocations are released in a controlled manner, ensuring rewards and incentives grow with ecosystem development.

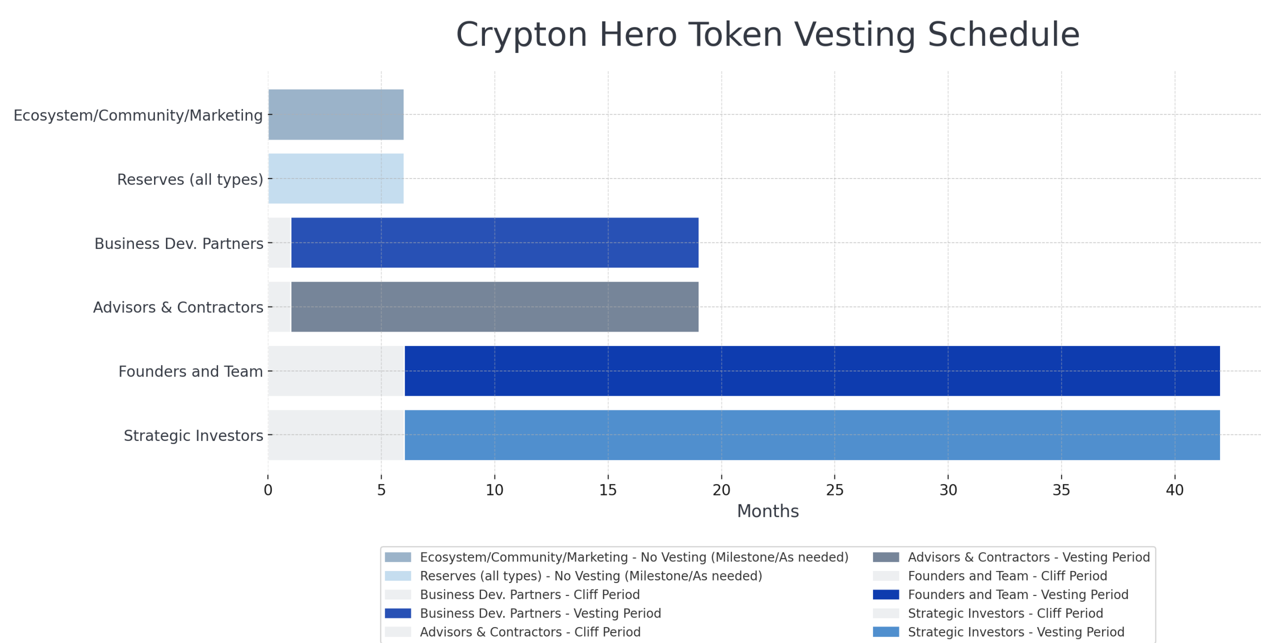
Reserves (Platform, Liquidity, Nonprofit, and Other)

Reserve allocations are held under platform or foundation governance and may only be accessed per clearly defined rules. Releases support operational integrity, liquidity, nonprofit initiatives, or platform needs, disclosed transparently.

Summary Table of Vesting Schedules

Allocation	Cliff Period	Vesting Duration	Release Frequency	Notes
Founders and Team	6 months	36 months	Every 6 months	Post-cliff, equal installments
Business Dev. Partners	30 days	18 months	Every 3 months	Post-cliff, equal installments
Strategic Investors	6 months	36 months	Every 6 months	Post-cliff, equal installments
Advisors & Contractors	30 days	18 months	Every 3 months	Post-cliff, equal installments
Ecosystem/Community/Marketing	None	Milestone-based	As achieved	Campaign/platform activity
Reserves (all types)	None	As needed	As governed	Platform/foundation oversight

Token Vesting Schedule (Illustrative Chart)



Note: This chart is provided for illustrative purposes only and should be read together with the detailed vesting schedules set forth in "Vesting Information" of this White Paper. In the event of any inconsistency between this chart and the vesting table, the table shall control.

Compliance & Transparency

Crypton Hero is fully committed to legal and regulatory compliance, robust user protection, and transparent communication for all participants in its token ecosystem. All policies governing token distribution, vesting schedules, platform operations, and data privacy are clearly defined and proactively disclosed to the community. Any changes or material releases related to token allocations or platform mechanics will be published in advance through the white paper and official public dashboards. Where applicable, vesting and release procedures are enforced by smart contracts or subject to independent audit to ensure accountability. Importantly, no vesting or lockup schedule is structured or intended as an investment offer or inducement. All disclosures are designed to comply with global securities regulations and to support the health and integrity of the Crypton Hero ecosystem. Participants are encouraged to review all policies, risk factors, and terms of use to ensure lawful and informed participation.

Regulatory Compliance

- **KYC/AML Requirements:**
  All purchasers of Crypton Hero Tokens (CHT) and participants in the Crypton Hero platform may be required to complete Know Your Customer (KYC) and Anti-Money Laundering (AML) verification in accordance with applicable law. Verification is mandatory where required by law for participation in any CHT token sale, distribution, or transfer involving regulated jurisdictions. Crypton Hero may refuse or restrict participation from any individual or entity failing to meet these requirements.
- Jurisdictional Restrictions:
  Crypton Hero aims to make the CHT utility token available globally, including in the United States and other major markets, strictly as a functional digital asset for platform access and use. All token sales, marketing, and platform operations are designed and conducted with a good-faith intent to comply with the laws and regulations of each jurisdiction in which they are offered, including but not limited to U.S. federal and state laws.
- If at any time Crypton Hero receives notification or guidance from regulators, or becomes aware that the sale, distribution, or use of CHT tokens is not permitted or may be restricted in any specific jurisdiction, Crypton Hero will take immediate action to suspend or restrict sales, distributions, or platform access for residents of that jurisdiction as required by law or regulatory order. Crypton Hero reserves the right to update its policies and take any necessary steps to ensure ongoing compliance.
- Prospective users and purchasers are solely responsible for ensuring that their participation in the CHT token sale and platform is in accordance with the laws and regulations applicable to them in their home jurisdiction.
- No Investment or Security Offering:
  CHT tokens are intended strictly as functional utility tokens for use within the Crypton Hero platform. They do not represent equity, shares, voting rights, entitlement to profits, or any other security or investment contract. No offer or solicitation is made to sell securities or financial instruments in any jurisdiction. CHT should not be acquired with any expectation of profit, resale value, or appreciation.

Marketing and Public Statements

All marketing, social media, and public communications will avoid investment-related terminology, including but not limited to “returns,” “invest,” “profits,” “trading,” or any implied promise of future value. Where future features or platform growth are discussed, these are framed solely as product development and not financial opportunity.

Platform and Token Sale Operations

- **Utility Activation and Platform Readiness:**
  CHT tokens are only intended for access to features and benefits within the Crypton Hero platform. If any tokens are sold prior to the public release of such features, the expected activation date and a clear timeline for utility will be disclosed prominently in all sale materials. CHT tokens have no use outside the Crypton Hero ecosystem, and there is no guarantee of value outside the platform.
- **Secondary Market and Exchange Listings:**
  There is **no guarantee or promise** that CHT tokens will be listed or tradable on any secondary market, centralized exchange (CEX), or decentralized exchange (DEX). Any peer-to-peer transfers or listings will be conducted in compliance with all applicable laws and only as permitted by the platform's operational readiness and jurisdictional restrictions. The Crypton Hero team will not provide liquidity or facilitate trading except as required for platform functionality.
- **Lockups and Resale Restrictions**:
  Certain allocations may be subject to vesting or lockup periods as disclosed in "Vesting Information". Users must comply with all restrictions on resale, transfer, or use imposed by applicable law, platform terms of service, and these lockup provisions.

Audit and Reporting

Crypton Hero will implement security audit procedures for all smart contracts governing the CHT token, vesting, and distribution. Where appropriate, the platform may engage third-party auditors or use internal verification methods based on the criticality and complexity of each contract. Audit summaries and any material findings may be disclosed to the public at the platform's discretion to support transparency and user trust.

Data Privacy

- **Personal Data Handling:**
  Crypton Hero does **not** store or process personal data off-chain, except as may be strictly required for NFT media uploads or to meet legal KYC/AML obligations (where applicable). Most user activity—including transactions, purchases, and NFT ownership—is managed directly on the public blockchain. Crypton Hero does not sell or share any personal data except as necessary for compliance or required by law. Users have the right to access, correct, or delete any data held for compliance purposes by contacting the compliance team.

Ongoing Disclosure and Transparency

- **Token Allocations and Vesting:**
  All token allocations, vesting schedules, and release events will be published in this white paper and updated on the official website. Any material changes to allocations or schedules will be communicated to the community in advance through official channels.
- Batch Minting Disclosure:
  For allocation categories using batch minting, each batch issuance (amount, date, recipient class) will be announced on the public dashboard or website to ensure full transparency.
- Community Feedback and Policy Review:
  Crypton Hero regularly reviews compliance and transparency policies in response to

changes in law, technology, and community feedback. Policy updates will be published on the official website.

Risk Disclosures

- **Legal and Regulatory Risks:**
  Blockchain and token regulations are evolving rapidly, and Crypton Hero may be subject to additional reviews, licensing, restrictions, or legal actions in one or more jurisdictions. Participation in the CHT token ecosystem involves legal, technological, and market risks. Users are responsible for ensuring that participation is lawful in their jurisdiction.
- **No Guarantee of Utility or Ongoing Access:**
  While Crypton Hero endeavors to provide a functional and accessible platform, technical or regulatory circumstances may affect the delivery, timing, or scope of utility features.
- **No Guarantee of Value or Liquidity:**
  CHT tokens have no intrinsic or assigned value outside the Crypton Hero platform. There is no guarantee that secondary markets will develop or that tokens can be sold or exchanged for any value.
- **No Investment Advice:**
  This document does not constitute investment advice, legal advice, or a recommendation to purchase any token or participate in the platform. Prospective users and purchasers should consult their own legal and financial advisors before participating.

Token Sale Structure & Utility Token Distribution Details

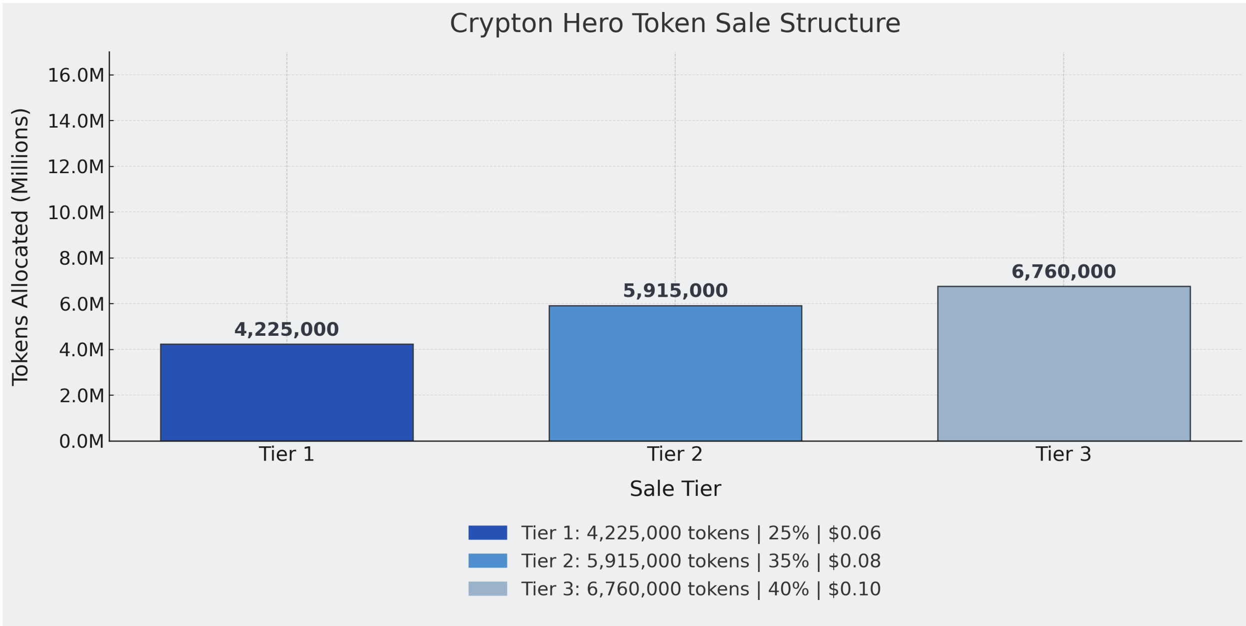
Crypton Hero offers its CHT utility tokens through a transparent, utility-first distribution process designed for broad access and community alignment. Tokens are sold exclusively for platform use and are not offered or marketed as investments.

Sale Rounds & Allocation

The CHT utility token sale is divided into three clearly defined tiers, each with straightforward terms and allocation:

- **Tier One**
  - 4,225,000 tokens (25% of sale allocation)
  - Price: $0.06 per token
  - The earliest limited time access to CHT tokens, offered to supporters who join at launch. No exclusive or invite-only requirements.
- **Tier Two**
  - 5,915,000 tokens (35% of sale allocation)
  - Price: $0.08 per token
  - A limited-time round following the tier one, open to all eligible participants on a first-come, first-served basis. No whitelist, closed list, or insider requirements—simply the next opportunity after tier one, with a set allocation and clear rules.
- **Tier Three**
  - 6,760,000 tokens (40% of sale allocation)
  - Price: $0.10 per token

Token Sale Structure Chart



Note: This chart provides a visual summary of the Crypton Hero public token sale structure, as detailed in "Token Sale Structure & Utility Token Distribution Details". All figures reflect the allocation, percentage, and price per tier as defined in the current white paper. For full details on sale mechanics, eligibility, and compliance, see "Token Sale Structure & Utility Token Distribution Details" and related compliance sections.

At the conclusion of the final public access window, any tokens that remain unclaimed or unused will be returned to the platform treasury under governance oversight. These tokens may be retained for future utility-related use within the Crypton Hero ecosystem.

Each participant in the tier one, tier two and tier three rounds must purchase a minimum of $60.00 subject to all KYC/AML, eligibility, and jurisdictional requirements described in Eligibility, KYC/AML, and Jurisdictional Restrictions. The platform may, at its discretion, change, remove, or reinstate the maximum purchase amount per participant for any sale round, including the public sale, as necessary to promote fair distribution and operational flexibility.

Separately, certain Crypton Hero NFTs — such as Founders Club membership NFTs described in "Founders Club NFT Community Access"— include periodic community rewards in the form of utility tokens for use within the Crypton Hero ecosystem. These tokens are distributed from the Ecosystem Incentives allocation described in "Founders Club NFT Community Access" and are not part of the CHT token sale rounds outlined above.

Token Sale Process & Delivery

- **Direct Sale Model**
  Tokens are purchased directly from the Crypton Hero platform (or official website) during each round. All terms, pricing, and sale windows are announced in advance.
- **Wallet Compatibility**
  Tokens are delivered directly to each participant's MetaMask wallet, which is the primary supported wallet for Crypton Hero. Users may also use any other ERC-20 compatible wallet to receive and hold CHT tokens, provided those wallets support standard Ethereum token interactions. Step-by-step onboarding guidance is provided for MetaMask, and additional support may be available for other leading ERC-20 wallets.

- Batch **Minting & Immediate Delivery**
  Tokens are batch-minted and delivered to buyers immediately upon purchase, except where vesting or lockup applies (see “Vesting Information”).
- Utility **Activation Timeline**
  All purchased tokens are fully usable for platform features within 90 to 120 days of the final public sale closing date. Tokens have no use or value outside the Crypton Hero platform.

Compliance & User Protections

- **KYC/AML & Jurisdictional Controls**
  KYC/AML verification may be required, per local law and platform policy. Users from restricted jurisdictions will not be able to participate. Eligibility criteria may be updated to comply with regulations.
- **No Guarantee of Exchange Listing or Liquidity**
  CHT tokens are not offered for speculative trading or resale. There is no guarantee of liquidity, secondary market, or exchange listing. Acquisition is for platform use only.
- **Fair Access Controls**
  Purchase limits, whitelisting, and anti-bot measures may be employed to ensure fair, broad distribution and to prevent abusive accumulation.
- **Finality of Sale**
  All token purchases are final and non-refundable, unless required by law. Crypton Hero will resolve any technical or delivery issues in good faith.

Transparency & Ongoing Disclosure

- **Sale Terms & Policies**
  All sale terms and compliance requirements are posted in advance for each round and are available via the official platform and website.
- **Right to Amend**
  Crypton Hero may amend sale structure, timing, or eligibility to comply with regulatory requirements or to protect the user community. Advance notice will be provided where possible.

Token Utility

Overview of Token Functionality

The Crypton Hero Token (CHT) serves as a utility token designed exclusively for use within the Crypton Hero Web3 application and affiliated digital environments. Its sole purpose is to enable user interaction with designated features, tools, and services that are native to the platform. CHT does not represent or convey any ownership interest, voting rights, share in company revenue, or entitlement to dividends. It is not a financial instrument and is not intended to serve as a vehicle for investment, profit generation, or speculative activity.

CHT tokens may be used by platform participants—including creators, collectors, and cause partners—to access enhanced functionality such as promotional features, campaign visibility tools, digital asset creation utilities, and other gated services. The token’s role is limited to unlocking or enhancing utility within the Crypton Hero ecosystem, and it is not required for general access to the platform.

Token incentives associated with Founders Club NFTs, where applicable, are distributed via airdrop directly to the holder's compatible wallet after purchase; they are not included within the NFT minting process itself.

The platform may, at its discretion, introduce new features or expand token-based access over time. Any such expansions are product-focused in nature and do not imply or constitute financial gain or asset appreciation. Users acquire and use CHT tokens solely to engage with operational features and should do so with no expectation of return, resale value, or appreciation.

Access to Platform Features

Creator Tools and Campaign Utilities

CHT tokens may be used to access advanced creator functions within the Crypton Hero Web3 application. These may include tools for minting digital assets, organizing fundraising campaigns, managing cause-linked NFT metadata, and assigning royalties to verified nonprofits. Access to these utilities may be gated or tiered based on token usage, helping creators scale campaigns efficiently while maintaining compliance with platform standards.

Visibility and Promotion Features

Token holders may use CHT to unlock enhanced visibility or promotional placements within the platform. These include—but are not limited to—priority listing of assets, featured campaign placement, or access to curated discovery channels. Such functionality enables creators and cause partners to elevate the reach of their initiatives in a competitive environment. These services are offered as functional utilities and do not guarantee traffic, outcomes, or monetary return.

Access to Premium Content or Experiences

While most platform features are broadly accessible, certain potential areas of the Crypton Hero ecosystem may include token-gated content, early access releases, or cause-related experiences offered exclusively to token users. These may include private creator sessions, limited-edition digital drops, or future metaverse-based participation features. These offerings, where available, are optional, experience-based, and have no financial or speculative component. At launch, these functions may be limited or under development.

Role-Based Access or Membership Levels

CHT may also be used to unlock defined roles or membership tiers within the Crypton Hero platform. Examples include creator verification, access to certain community or governance functions, or eligibility for promotional or philanthropic partner campaigns. These roles are assigned strictly based on token usage or platform engagement and confer no ownership, voting, or equity rights. All role-based benefits are functional and purpose-driven.

Disclaimer:
All token-related features described in this section are subject to change based on platform updates, regulatory requirements, or ecosystem developments. Crypton Hero reserves full discretion over the availability and scope of any feature described herein.

Token Sale Terms & Compliance

Eligibility and Jurisdictional Restrictions

Participation in the Crypton Hero token sale is subject to all applicable laws and regulations in each participant's country, state, or jurisdiction of residence. Tokens will only be offered and sold in those jurisdictions where such activity is legal and does not require registration or licensing of the offering, the company, or its personnel. The company expressly prohibits participation by any person or entity located in, organized in, or a resident of any jurisdiction where the sale, purchase, or use of utility tokens is restricted, prohibited, or would require registration as a security or other regulated financial instrument.

Prior to participating in the token sale, all prospective purchasers are required to confirm that their participation is lawful in their home jurisdiction and that they are not subject to any sanctions, prohibitions, or restrictions under local or international law. The company reserves the right, in its sole discretion, to deny or restrict access to the token sale or platform for any reason, including but not limited to compliance with legal, regulatory, or policy requirements. The company will implement Know Your Customer (KYC), Anti-Money Laundering (AML), and sanctions screening procedures as required by law to prevent unauthorized or unlawful participation.

The company further reserves the right to update the list of restricted jurisdictions and to modify eligibility criteria at any time to reflect changes in applicable law, regulation, or company policy. Any such updates will be disclosed via official company channels.

KYC/AML Requirements

Participation in any Crypton Hero token sale may require completion of Know Your Customer (KYC) and Anti-Money Laundering (AML) verification, as determined by applicable law and platform policy. Where these checks are necessary, purchasers may be asked to provide identification or supporting documentation to complete their purchase. The platform reserves the right to limit or restrict participation for individuals or entities who do not complete these requirements when requested.

Restricted Countries and Regions

Token sales are not available to individuals or entities located in, resident in, or otherwise subject to the laws or regulations of any jurisdiction in which participation is prohibited by applicable law or regulation. The list of restricted countries or regions may be updated from time to time in accordance with legal guidance and platform policy.

Sale Procedures and Purchase Limits

Minimum and Maximum Purchase Amounts

Each participant must purchase a minimum of $60.00 (USD equivalent) worth of CHT tokens per sale transaction. For the tier one, tier two, and tier three rounds. The minimum purchase amounts apply equally across all eligible participants within each respective round.

Sale Rounds and Access Windows

Token sales will be conducted in designated rounds or windows, as described in the token sale structure. Details regarding timing, pricing, and allocation for each round will be published in advance.

Anti-Bot and Abuse Prevention Measures

The platform may implement anti-bot controls and abuse prevention mechanisms, including, but not limited to, participant whitelisting, purchase monitoring, and transaction throttling, to ensure fair access and integrity of the sale process.

Resale, Transfer, and Lockup Restrictions

Vesting Schedules and Lockup Periods

Tokens purchased in certain sale rounds or allocations may be subject to vesting schedules or lockup periods as described in the “Vesting Information” section. These restrictions are in place to support long-term project stability and prevent immediate resale.

Secondary Market Limitations

There is no guarantee that CHT tokens will be listed on secondary markets, exchanges, or trading platforms. Any peer-to-peer transfer, resale, or exchange activity must comply with applicable law, platform terms, and any lockup or vesting restrictions in place.

User Agreements and Legal Disclosures

Terms of Sale and Participation

All purchasers must agree to the published terms of sale and participation before completing any transaction. These terms outline rights, responsibilities, eligibility requirements, and other material aspects of token acquisition and platform use.

Risk Disclosures and Acknowledgments

All participants are required to acknowledge the risks associated with token purchases, including, but not limited to, regulatory, market, and technological risks, and the lack of any guarantee regarding value, utility, or future platform development. CHT tokens are not intended as investments and confer no ownership, voting, or profit rights.
Participation in any sale does not entitle the purchaser to any refund or recourse, except as required by applicable law.

Token Burn Policy

Overview of Burn Mechanisms
Crypton Hero utilizes burn mechanisms only for unsold or unclaimed NFTs offered via platform sales or campaigns. The platform does not burn unsold ERC-20 utility tokens (CHT); instead, any tokens remaining at the close of a sale window are returned to the Treasury or reserved pool for future utility-based use.

Unsold NFT Burn Procedures
At the conclusion of any NFT sale or designated minting period, unsold or unclaimed NFTs may be permanently removed from circulation by sending them to an irretrievable burn address. This ensures that limited-edition and campaign-based digital assets retain their stated scarcity, and that inventory is managed transparently. The decision to burn unsold NFTs is based on campaign rules, smart contract design, or platform policy.

Transparency and Reporting
All NFT burn events, including the number of assets, relevant contract addresses, and transaction hashes, will be publicly disclosed and verifiable on the appropriate blockchain explorer. Summaries of burn events will be published via the official Crypton Hero website or dashboard for community reference.

Policy Updates and Amendments
This Token Burn Policy may be updated to reflect changes in platform strategy, best practices, or regulatory requirements. Any amendments will be communicated to the community via official channels and implemented in a manner that prioritizes transparency, fairness, and compliance.

Token Liquidity & Exchange Listing Plan

The Crypton Hero Token (CHT) is designed exclusively as a utility token for use within the Crypton Hero platform. Our liquidity and exchange listing strategy is focused on making it as easy as possible for genuine users to acquire CHT for access to platform features and services. All exchange activities are structured to support this mission—never for investment or speculative purposes. Crypton Hero is committed to a compliant, user-focused approach that prioritizes simplicity, transparency, and accessibility.

Decentralized Exchange (DEX) Listing Strategy

Target Timing and Approach

To support a seamless user experience, Crypton Hero intends to list CHT on a leading Ethereum-based decentralized exchange—such as Uniswap or a similar platform—within approximately 9 to 18 months following the initial token sale. The primary objective of this listing is to make it easier for users of the Crypton Hero Web3 application to locate and acquire CHT as needed for legitimate use within the platform. The timing and choice of exchange will be determined based on platform readiness, user demand, and overall market conditions, always with a focus on serving our active user community.

Initial Liquidity Provision

Initial liquidity for the DEX listing will be provided directly by the company, using tokens allocated for liquidity in the official distribution plan and the necessary ETH (or other pairing assets). This company-led approach is intended to ensure stable, fair, and reliable access to CHT for users who need tokens to participate in platform activities. No incentives, rewards, or yield programs will be offered or implied in connection with liquidity provision. The company will not promise any minimum or continuous liquidity level but will review and may adjust liquidity as appropriate to maintain ease of access for genuine platform users.

Ongoing Liquidity Management

After the initial listing, the Crypton Hero team will monitor user activity and platform needs. The company may adjust liquidity as necessary to support ongoing access to tokens for platform engagement, in line with the project's utility-driven mission and policies. No liquidity mining, staking, or yield-generation programs will be launched or promoted by the company.

Centralized Exchange (CEX) Listing Strategy (Exploratory)

While the initial focus is on DEX accessibility for platform users, Crypton Hero may consider evaluating reputable centralized exchanges in the future to further facilitate access for a growing user base. Any such consideration will be guided by the same principle: to make it more convenient for real users to obtain CHT for legitimate use on the platform, not for speculation. No CEX applications or arrangements exist as of this writing, and any updates will be announced only through official channels, always in line with our compliance-first approach.

Regulatory and Compliance Considerations

All plans for exchange listings, liquidity, and token access are subject to ongoing legal and regulatory review. CHT is offered strictly as a utility token, and no exchange or liquidity plan should be interpreted as an offer of investment, security, or profit opportunity. Every effort is made to ensure that users can acquire and use CHT solely to access platform features and services.

Risks and Limitations

Token liquidity and exchange access are not guaranteed. Platform needs, market conditions, and regulatory factors may affect the availability, price stability, or functionality of CHT on any exchange. The price of CHT is determined solely by the independent activity of users and market participants, and may fluctuate significantly. Crypton Hero does not participate in, support, or guarantee any price stabilization, appreciation, or depreciation of CHT, and will not intervene in market pricing under any circumstances. There is no assurance of continuous or sufficient liquidity, and users should be aware that prices may fluctuate and access may be limited. Participation in any exchange or token transfer is solely at the user's discretion and risk.

Roadmap and User Disclosure

All important updates regarding exchange listings, liquidity events, and token access will be disclosed transparently via the official Crypton Hero website and communication channels. All exchange activities are implemented for the convenience and benefit of real platform users. Any timelines are indicative only and may be adjusted as the project evolves. Crypton Hero encourages users to stay informed and to acquire CHT strictly for participation in the ecosystem.

Legal Disclaimers & Risks

General Legal Disclaimer

This document is provided for informational purposes only. It does not constitute legal, financial, or investment advice. Readers should consult their own professional advisors before participating in the Crypton Hero platform.

No Investment or Securities Offering

Crypton Hero Token (CHT) is offered exclusively as a functional utility token for use within the Crypton Hero platform. CHT does not represent an investment, security, equity, or any right to profits or returns. Nothing in this document or the operation of the platform should be construed as an offer or solicitation to buy or sell securities or financial instruments in any jurisdiction. Please refer to "AML/KYC and Token Liquidity & Exchange Listing Plan" for additional compliance details.

Regulatory and Jurisdictional Notice

The legal and regulatory status of digital assets and utility tokens may change over time. Participation in the Crypton Hero platform may be restricted or prohibited in certain jurisdictions. Users are solely responsible for complying with all applicable laws and regulations in their home country.

Technical, Market, and User Risk Summary

Participation in the Crypton Hero platform involves certain risks, including but not limited to: smart contract limitations, cybersecurity threats, token loss or inaccessibility, and fluctuations in market price or liquidity. The company does not guarantee continuous platform operation, token availability, or access to third-party exchanges. For detailed discussion of these risks, see

"AML/KYC, Eligibility" and "Token Liquidity & Exchange Listing Plan" and the "Risks and Limitations" sections throughout this white paper.

Limitation of Liability

To the maximum extent permitted by law, Crypton Hero and its affiliates disclaim all liability for any direct, indirect, or consequential loss or damage arising from participation in the platform, use of CHT, or reliance on this document. Users participate at their own risk and are responsible for their own decisions and compliance.

Additional Policies

The following policies and commitments are addressed in detail elsewhere in this white paper or in the official Crypton Hero Terms of Service:

- **Anti-Money Laundering (AML) and Know Your Customer (KYC):** See "AML/KYC Compliance Requirements" for a full overview of AML and KYC compliance requirements.
- **Reporting and Transparency Commitments:** See "Reporting and Transparency Commitments" for disclosures on reporting, transparency, and ongoing communication with users.
- **Policy Updates and Amendments:** See "Policy Updates and Amendments" for details on how Crypton Hero may update or amend platform policies as needed.
- **Conflict Resolution and Dispute Handling:** Please refer to the Crypton Hero Terms of Service for all matters relating to conflict resolution and dispute procedures.

This section is reserved for any additional policies or regulatory matters that may arise prior to platform launch.

Legal & Compliance

Corporate Entity & Jurisdiction

The following subsections set forth the legal structure, corporate registration, and governing jurisdiction of Crypton Media, Inc., the entity responsible for the development and operation of the Crypton Hero platform.

Corporate Overview

Crypton Media, Inc. is a privately held corporation established to develop and operate the Crypton Hero platform and related digital services. The company is structured to support secure, transparent, and compliant Web3 product development and token distribution.

Jurisdiction & Registration

Crypton Media, Inc. is incorporated as a C-Corporation under the laws of the State of Wyoming, United States. All corporate governance and business operations are conducted in accordance with applicable Wyoming statutes and federal regulations.

Regulatory Compliance & AML/KYC

Federal & State Law

Crypton Media, Inc. conducts all business operations and token distributions in full accordance with applicable United States federal and state laws, including but not limited to those governing digital assets, anti-money laundering, consumer protection, and data privacy. The company continuously monitors regulatory developments to ensure ongoing compliance and may update its policies and procedures as required by changes in law or guidance.

AML/KYC & OFAC Policy

Crypton Media, Inc. implements Know Your Customer (KYC) and Anti-Money Laundering (AML) measures for all token sales and user onboarding, as required by law. The company screens participants to prevent illicit activity and to comply with all applicable regulations. Crypton Media, Inc. does not permit participation in token sales or platform use by individuals or entities located in countries or territories subject to sanctions administered by the U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC), or by persons designated on any OFAC sanctions lists. Participation in the Crypton Hero platform is subject to ongoing compliance review and may be restricted, suspended, or terminated in accordance with applicable law.

Utility Token Disclaimer

No Investment/Securities Statement

The Crypton Hero token (CHT) is offered exclusively as a functional utility token for use within the Crypton Hero platform. CHT does not represent an investment contract, security, equity interest, or any right to share in profits, revenues, or appreciation in value. No statement herein or in any related material shall be interpreted as an offer or solicitation to sell securities or investment products in any jurisdiction.

Utility Token Positioning

CHT tokens are designed solely to provide access to features, services, and benefits within the Crypton Hero ecosystem. They are intended for use by platform participants to engage with and unlock platform functionality. Acquisition or use of CHT tokens does not entitle holders to any ownership, voting rights, dividends, or financial returns. Users should acquire CHT solely for platform participation and with no expectation of profit, resale value, or appreciation.

Risk Disclosure

Legal & Regulatory Risks

Participation in the Crypton Hero platform and acquisition or use of CHT tokens involves certain legal and regulatory risks. Laws and regulations governing blockchain technology, digital assets, and token use continue to evolve and may be subject to change in the United States and other jurisdictions. While Crypton Media, Inc. is committed to full compliance with applicable law, new or changing regulations may impact platform features, token utility, or user eligibility. Participants are responsible for ensuring their actions comply with the laws and regulations of their home jurisdiction. Crypton Media, Inc. may update platform policies or restrict access in response to changes in applicable law or regulatory guidance.

Technical & Operational Risks

Use of the Crypton Hero platform and CHT tokens may involve technical and operational risks inherent to blockchain-based digital assets. These risks include, but are not limited to, software vulnerabilities, smart contract bugs, cybersecurity incidents, system downtime, transaction delays, or loss of access to digital assets. While Crypton Media, Inc. employs industry best practices to mitigate such risks, no system can be guaranteed to be fully secure or free from errors. Users are encouraged to take all reasonable precautions to safeguard their accounts, wallets, and private keys, and to understand the risks before participating.

Terms of Use Reference

All access to the Crypton Hero platform—including the use of CHT utility tokens—is guided by our Terms of Use, which are easily accessible through official company channels and onboarding flows. These terms are designed to foster a safe, transparent, and positive experience for everyone in our community.

Agreement to Terms

By joining Crypton Hero—whether exploring the platform, acquiring tokens, or participating in campaigns—users agree to the Terms of Use. These terms are presented up front and throughout the onboarding process, forming the basis of a clear, respectful relationship between users and Crypton Media, Inc.

Key Provisions

Our Terms of Use cover several important areas to help ensure a fair and trustworthy environment for all, including:

- **Permitted and Prohibited Activities:** Guidance on appropriate participation and community standards.
- **Eligibility and Account Security:** Simple requirements for getting started and keeping your account and assets secure.
- **Intellectual Property and Licensing:** Respect for the creative work and trademarks that make Crypton Hero unique, while supporting community creativity and fair use.
- **Token Use and Restrictions:** Clear explanation that CHT tokens are meant only for utility and platform access, not as investments.
- **Dispute Resolution and Governing Law:** Straightforward paths to resolve any disagreements or questions that may arise.
- **Limitations of Liability and Risk Disclosures:** Honest information about platform risks and our commitments as a company.

Binding and Evolving Agreement

As the Crypton Hero platform grows, so may our Terms of Use. We will keep the community informed in advance of any important updates, and continued participation means users accept any new terms. We encourage everyone to check in periodically to stay up to date.

User Responsibility

We encourage all participants to review and understand the Terms of Use before engaging with Crypton Hero or acquiring CHT tokens. If you have questions, we invite you to seek advice from your own legal, tax, or financial professionals, or to reach out to our compliance team.

Reference and Access

The most current Terms of Use will always be available through official company channels—including the platform interface, onboarding, our website, or dedicated token sale pages, as applicable.

Until a permanent online location is announced, the Terms of Use will also be provided directly to users during onboarding, by email, or by other secure means as determined by Crypton Media, Inc.

For further details, or if you have questions about the Terms of Use, you can always refer to the Crypton Hero app or website, or contact the company’s compliance officer or designated compliance personnel.

Security & Readiness Statement

Platform Status & Near-Market Readiness

The Crypton Hero platform is in advanced development, with all core components undergoing comprehensive internal testing on the Ethereum Sepolia testnet. Our team is focused on quality assurance and operational reliability as we move toward public launch. While no invitations for external or public testnet participation are currently being extended, Crypton Media, Inc. may consider inviting selected external testers, as appropriate, to support platform readiness as development progresses.

Crypton Media, Inc. is committed to delivering a secure, reliable, and transparent platform experience. At this stage, we are not providing specific release dates or public timelines, but users and stakeholders will be kept informed of significant readiness milestones through official communication channels.

Security Audit Roadmap

Security is central to our approach at Crypton Hero. As part of our go-to-market process, we strive to implement industry-standard security protocols and best practices across our smart contracts and application infrastructure.

It is our intention to complete an independent third-party security audit on all core smart contracts and platform functions prior to public launch. The results of this review, and any resulting measures to enhance platform security, will be disclosed to stakeholders as appropriate. Crypton Media, Inc. will continue to monitor, assess, and update platform security on an ongoing basis in line with industry standards.

No digital system can be guaranteed to be entirely free of vulnerabilities or operational risks. Crypton Hero will take all reasonable measures to help safeguard user accounts and digital assets, and we recommend that users maintain good security practices in managing their accounts and wallets.

Ongoing Compliance Monitoring

Crypton Media, Inc. is committed to maintaining the highest standards of legal and regulatory compliance across all operations related to the Crypton Hero platform and CHT utility token. Recognizing the rapidly evolving nature of blockchain regulation, the company treats ongoing compliance as a core, continuous priority—helping ensure uninterrupted token utility and long-term platform stability.

Continuous Regulatory Review

We actively track developments in U.S. federal and state law, as well as global regulatory frameworks, staying ahead of changes in digital asset requirements, anti-money laundering (AML), know your customer (KYC), and consumer protection standards. This proactive approach helps safeguard the platform's operations and the community's ability to transact seamlessly.

Internal Compliance Audits & Legal Oversight

Our compliance team conducts regular internal reviews, supported by independent legal and regulatory experts when needed. Any material changes in applicable law or guidance are promptly evaluated and integrated into company policies, platform features, and token management procedures.

Responsive Policy Updates

We maintain a proactive approach to updating platform policies, user terms, and compliance documentation to reflect new requirements or mitigate emerging risks. Significant updates are shared transparently through official channels, ensuring token holders and partners always understand how changes may affect platform use.

Community & Stakeholder Reporting

Crypton Media, Inc. encourages active participation in maintaining a compliant ecosystem. Community members and stakeholders can report compliance concerns directly to our team for prompt review and resolution.

Commitment to Best Practices

Compliance is not a one-time milestone—it's an ongoing commitment that evolves alongside both technology and regulation. By aligning with industry-leading standards and adapting to change, Crypton Media, Inc. helps ensure the Crypton Hero platform remains secure, reliable, and ready for global growth.

Transparency & Token Holder Rights

Transparency & Reporting Commitment

Crypton Media, Inc. is committed to providing clear and accurate information regarding material matters that may affect the use of the Crypton Hero platform or the CHT utility token. This commitment is focused on meeting applicable legal and regulatory obligations while protecting the security and integrity of the platform.

The company will notify token holders and relevant stakeholders of any material changes to legal, technical, or operational policies that could affect platform functionality or token utility. All such notifications will be made through official communication channels.

Where applicable, summaries of independent security, compliance, or operational reviews will be made available to stakeholders in a manner consistent with applicable law and industry practice.

To protect the interests of the company, its partners, and its users, public disclosures will not include proprietary, confidential, or sensitive information that could compromise security, competitive position, or regulatory compliance.

Token Holder Rights & Limitations

Ownership of Crypton Hero Tokens (CHT) does not represent or confer any ownership interest, equity stake, share, security, or equivalent rights in Crypton Media, Inc., its affiliates, or any associated entity. CHT does not entitle holders to any form of dividend, profit-sharing, voting right, or participation in the governance of the company, the platform, or its assets.

This section also applies to CHT tokens issued as incentives in connection with NFT purchases as described in "Founders Club NFT Community Access".

The sole purpose of CHT is to function as a digital utility token within the Crypton Hero platform, enabling holders to access specific features, benefits, and discounted services as described in "Tokenomics & Token Utility Details". Use of CHT for these purposes may be subject to change or modification at the company's sole discretion to reflect platform updates, regulatory requirements, or operational needs.

Nothing in this white paper, nor the distribution of CHT, shall be construed as an offer or solicitation for investment, nor as the marketing of a financial product. Acquisition and use of CHT should be undertaken only by those with a complete understanding of its intended utility and without any expectation of financial return.

No Guarantee of Exchange Listing or Value

There is no guarantee that the Crypton Hero Token (CHT) will be listed on any exchange or that it will have any market value outside the Crypton Hero platform. CHT is offered solely for use as a functional utility token within the platform. Users should not acquire CHT with any expectation of profit, resale opportunity, or appreciation in value.

For information on the company's current operational approach to potential exchange accessibility, see "Token Liquidity & Exchange Listing Plan". Any such activities will be conducted solely to facilitate legitimate platform use and are subject to change without notice.

Forward-Looking Statements Disclaimer

This document may contain statements about future plans, objectives, expectations, projections, or other forward-looking information regarding the Crypton Hero platform, its associated technologies, or its community initiatives. Such statements are based on the company's current expectations and assumptions as of the date of publication and are subject to a variety of factors, many of which are beyond the company's control.

Forward-looking statements are not guarantees of future performance or outcomes. Actual results, performance, or achievements may differ materially due to changes in market conditions, technology, regulations, community adoption, or other unforeseen events.

Nothing in these statements should be interpreted as a promise or assurance that any particular feature, timeline, or objective will be achieved. The company undertakes no obligation to update or revise any forward-looking statements, except as required by applicable law.

Jurisdictional Restrictions Summary

Crypton Hero welcomes a global community of users, but participation in any Crypton Hero Token (CHT) transaction must comply with applicable laws in each participant's home jurisdiction. Certain regions may restrict or prohibit the purchase, use, or transfer of digital tokens. These restrictions include jurisdictions subject to comprehensive sanctions imposed by the United States, the United Kingdom, the European Union, or the United Nations, as well as other regions identified in "Regulatory Compliance & AML/KYC".

We encourage all participants to review and follow their local regulations before acquiring or using CHT. The company will maintain and update the list of restricted jurisdictions as required, and any changes will be communicated through our official channels.

Independent Audit & Compliance Review Commitment

As part of its ongoing commitment to lawful operations and responsible governance, Crypton Media, Inc. may engage qualified independent parties to review selected aspects of the Crypton Hero platform, token-related processes, and applicable compliance measures.

Any such reviews will be conducted at the company's discretion and in accordance with applicable laws and regulatory requirements. The scope, timing, and frequency of these reviews will be determined solely by the company, and any findings or outcomes will be disclosed only to the extent required by law or regulation.

Roadmap & Milestones

Roadmap Overview

Crypton Hero's roadmap provides a high-level view of concept development, product launches, token sale events, and the anticipated expansion into the metaverse. All dates and milestones are based on current management estimates and are subject to change as described in the accompanying disclaimers.

This journey reflects our commitment to long-term innovation, community impact, and building a new standard for digital philanthropy.

Key Development Phases

2024: Laying the Foundation for Vision and Prototyping

- Q3 2024:
  - Crypton Hero concept and design begins
  - Conceptual Mockup website completed and published
  - Early version (V1.0) Web3 app published to the testnet under the working.
- Q4 2024:
  - Crypton Hero concept and design completed
  - Early testing version 1.0 Web3 app begins
  - Conceptual design for Crypton Hero Branding begins
  - Conceptual design and content concepts are tested on the CH V1.0 Web3 app

2025: Advancing Platform and Community Growth

- Q1 2025:
  - Crypton Hero branding concepts finalized
  - Testing on the CH V1.0 Web3 app continues
  - Form and function for the pre-release test version begins finalization
- Q2 2025:
  - Branding of the Crypton Hero Web3 app UI begins
  - Pre-release version of Crypton Hero (V2.0) is pushed to the testnet
- Q3 2025:
  - Branding of the Crypton Hero Web3 app completed
  - Testing of the CH pre-release V2.0 continues
  - Crypton Hero pre-release V2.1 pushed to the testnet
  - Utility Token Tier 1 Sales begin
  - Tokens batch-minted and delivered at purchase
  - Platform utility unlocks within 90 to 120 days of the final Tier 3 public sale closing date
- Q4 2025:
  - Testing Crypton Hero pre-release V2.1 and development of the CH production release V1.0
  - Founders Club NFTs launch
  - Founders Circle – Lifetime membership
  - Limited edition NFTs for early supporters
  - Early onboarding of non-profits and creators begins

2026: Expanding Ecosystem Utility and Metaverse Readiness

- Q1 2026:
  - Utility Token Tier 2 Sales begin
  - Founders Club NFTs launch
  - Inner Circle - 5-year membership
  - Limited edition NFTs for early supporters
  - Finalize and test the Crypton Hero production release V1.0
  - Continue onboarding non-profit partners and creators
  - Begin onboarding early collectors
- Q2 2026:
  - Utility Token Tier 3 Sales begin
  - Soft Launch Crypton Hero V1.0
  - Limited NFT transactions and platform testing with a select group of early adopters
  - Develop and introduce Creator subscriptions and begin marketing early adopter NFTs
  - Develop and introduce additional token utility use cases
- Q3 & Q4 2026:
  - Full Public Launch
  - All core platform features go live within this window
  - Public onboarding of creators, collectors, and nonprofit partners
  - Select platform users may gain access to early metaverse-driven experiences, with limited features introduced as part of Crypton Hero's evolving digital landscape
  - Begin design, development, and testing of the Crypton Hero Metaverse
  - Launch of global marketing, partnerships, and ongoing awareness campaign
  - Refine and enhance the Crypton Hero Web3 app

Forward Outlook (Late Q4 2026–2027):

- Launch the Crypton Hero metaverse (late Q4 2026 to mid-Q1 2027)
- Continuous enhancements to the Crypton Hero Web3 app
- Ongoing expansion and enhancements to the Crypton Hero metaverse
- Virtual and live events and expansion of ecosystem partnerships

Past Achievements

- Conceptual mockup website completed and published (2024)
- Early version (V1.0) Web3 app published to testnet under the working name Crypton Media (Q3 2024)
- Crypton Hero branding concepts finalized (Q1 2025)
- Pre-release versions (V2.0, V2.1) tested on the testnet (2025)
- Brand and UI finalized (2025)
- Early progress validates both our technology and our vision for continuous, purpose-driven growth.

Upcoming Milestones

The following milestones illustrate our ongoing commitment to platform innovation, user experience, and expanding impact across the Web3 and nonprofit communities.

- Utility Token Tier 1, 2, and 3 sales events
- Batch minting and delivery of tokens at each stage
- Founders Club NFT launches (Founders Circle, Inner Circle)

- Launch and scaling of onboarding for creators, collectors, non-profits
- Full public platform launch
- Initial rollout of metaverse-driven experiences
- Metaverse public launch (late 2026–early 2027)
- Ongoing development of new utility token use cases and partnerships

Future Vision & Expansion

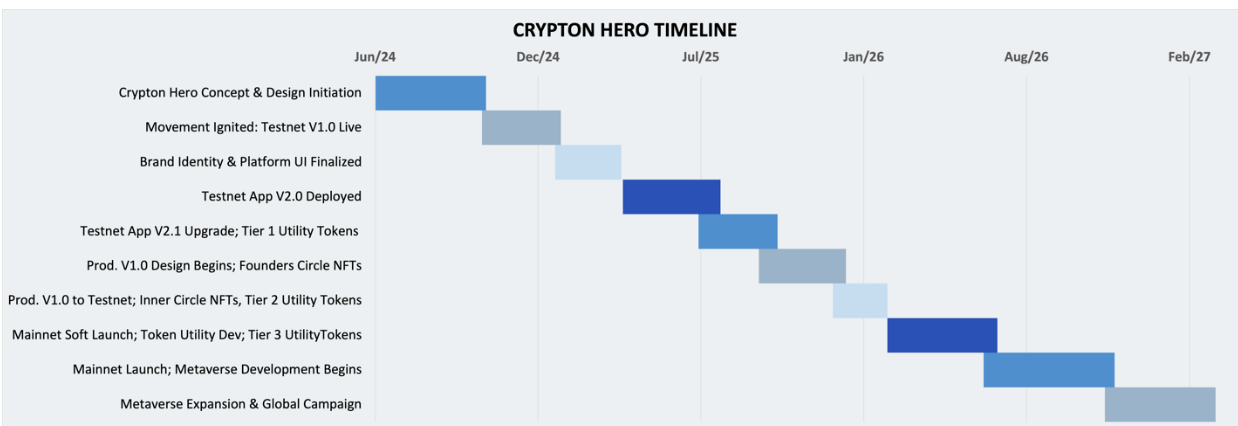
- Immersive, purpose-driven metaverse experiences
- Ongoing app and ecosystem enhancements
- Expansion of global partnerships and live/virtual events
- Broadening utility and features based on community and market feedback

Our vision for Crypton Hero is an evolving ecosystem where technology, philanthropy, and community converge for sustainable global good.

Roadmap Risks & Assumptions

- Timelines and milestones are management estimates and subject to change based on technology, resource availability, regulatory developments, and market conditions
- Product features and launch dates may shift as required for compliance, security, or platform readiness
- Unforeseen factors (technical, legal, or economic) may impact development pace

Roadmap Visual/Timeline



Timeline Notes

In the spirit of full transparency, please note:

Testnet Access Disclaimer:
As of this white paper's release, the Crypton Hero Web3 app running on the Ethereum testnet is not available for public use. If management decides to invite outside participants for limited access or testing in the future, we'll announce those opportunities—along with all relevant details—through our official channels. Access to the testnet app, if offered, will be at management's discretion and is not guaranteed.

Timeline Disclaimer:
The development milestones and dates presented in this roadmap reflect management's current

expectations based on available information, projected development timelines, and anticipated market conditions as of the date of this white paper. All timelines and milestones are provided for reference only and may be subject to adjustment in response to changes in technology, resource availability, regulatory developments, or other factors beyond the company's control. Management reserves the right to revise the roadmap at any time to ensure the success and sustainability of the project

Legal Disclaimers, Forward-Looking Statements & Terms of Service

Disclaimer: Certain legal disclaimers, warnings, and risk statements may also appear elsewhere in this White Paper for emphasis and user clarity. However, the provisions set forth in "Legal Disclaimers, Forward-Looking Statements & Terms of Service" are intended to be comprehensive and controlling. In the event of any inconsistency, the language in those sections shall prevail.

Legal Disclaimers

The following legal disclaimers apply to all aspects of the Crypton Hero project, including its token, platform, products, and associated activities. These disclaimers are intended to clarify the legal position of Crypton Hero, set clear expectations for users, and address key regulatory considerations. All participants are expected to read, understand, and accept these disclaimers before engaging with the project.

Statement of Non-Solicitation (see also Executive Summary)

This White Paper and all related materials are provided solely for informational and educational purposes regarding the Crypton Hero project, its utility token, platform, and associated products. Nothing contained herein, nor any statement made by Crypton Hero, its affiliates, team members, or partners, constitutes an offer to sell, a solicitation of an offer to buy, or a recommendation to purchase, sell, or hold any securities, investment products, or financial instruments in any jurisdiction. Participation in the Crypton Hero platform and any acquisition or use of Crypton Hero tokens or NFTs is limited to persons and entities who are eligible under applicable laws and is undertaken solely for purposes of utilizing the platform's features and supporting philanthropic initiatives, not for investment or speculative purposes.

No Investment or Financial Advice (see also "EXECUTIVE SUMMARY")

Nothing in this White Paper or in any other materials or communications provided by Crypton Hero, its affiliates, team members, or partners should be construed as investment advice, financial advice, legal advice, or tax advice. Crypton Hero does not provide or purport to provide any recommendation or guidance as to the acquisition, holding, use, or disposition of any tokens, NFTs, or other digital assets. Participants are solely responsible for conducting their own due diligence and consulting with their own professional advisors before making any decisions related to the Crypton Hero platform or its associated digital assets. The contents of this White Paper are not intended to be, and must not be taken as, a substitute for independent professional advice.

No Guarantees or Warranties—Project, Token, and Platform

All aspects of the Crypton Hero project—including, without limitation, its platform, tokens, NFTs, software, services, and any related content—are provided strictly on an "as is" and "as available" basis without any representations, guarantees, or warranties of any kind, whether express or implied. Crypton Hero, its affiliates, team members, and partners expressly disclaim all warranties, including, but not limited to, warranties of merchantability, fitness for a particular purpose, title, non-infringement, and uninterrupted or error-free operation. No statement or information, whether oral or written, obtained from Crypton Hero or through the platform, shall create any warranty or representation not expressly stated herein. Users assume all risk associated with their participation in the Crypton Hero platform and acknowledge that no assurances are made regarding the future value, function, or availability of any aspect of the project.

Compliance with Laws & Regulations

Participants in the Crypton Hero platform are solely responsible for ensuring that their actions comply with all applicable laws, regulations, and rules in their respective jurisdictions. Crypton Hero, its affiliates, team members, and partners do not make any representations or warranties regarding the legality of participation in the platform, acquisition or use of tokens or NFTs, or access to any services in any particular jurisdiction. It is the obligation of each participant to determine whether their involvement with Crypton Hero is lawful and permitted under the laws that apply to them.

Jurisdictional Limitations

Access to the Crypton Hero platform, acquisition or use of Crypton Hero tokens or NFTs, and participation in any related activities may be restricted or prohibited by law in certain jurisdictions. Crypton Hero expressly reserves the right to limit or deny access to the platform, tokens, NFTs, or services in any country, state, or territory where such activities are unlawful, require registration, or are otherwise regulated. Participants are not permitted to use the platform or acquire tokens or NFTs in any jurisdiction where such use or acquisition would violate applicable law or regulation.

Risk Factors (see also “Risk Factors”)

Participation in the Crypton Hero platform and use of its tokens, NFTs, and related services involve significant risks. Prospective participants should carefully consider the following risk factors, as well as all other information contained in this White Paper, before deciding to engage with the platform.

Token Utility and Value Risks

Crypton Hero tokens are intended solely for use within the platform’s ecosystem and do not represent any form of equity, security, or right to profits. There is no guarantee as to the market value, liquidity, or continued utility of the tokens, and their value may fluctuate significantly or become entirely illiquid. Tokens may lose all utility or value at any time, and there is no assurance that any secondary market will exist for their exchange.

Technology and Security Risks

The Crypton Hero platform, its tokens, and associated smart contracts are based on blockchain and other emerging technologies that may be subject to vulnerabilities, bugs, hacking, cyberattacks, or other security incidents. Technical failures, bugs, or malicious activity could result in the loss, theft, or inaccessibility of tokens or platform features. Crypton Hero does not guarantee the absolute security or uninterrupted operation of the platform or its smart contracts.

Regulatory and Legal Risks

The regulatory status of blockchain-based platforms, tokens, and NFTs is evolving and may vary by jurisdiction. Legislative or regulatory changes, enforcement actions, or new interpretations of existing law could adversely impact the legality, operation, or accessibility of the Crypton Hero platform, tokens, or NFTs. Participants are solely responsible for ensuring compliance with all applicable laws and regulations.

Operational Risks

The development, launch, and ongoing operation of the Crypton Hero platform depend on a variety of factors, including third-party providers, platform upgrades, community participation, and ongoing funding. Delays, failures, or disruptions in operations, as well as the loss of key team members or partners, could negatively affect the platform's functionality, reputation, or viability.

Market Risks

The broader digital asset and NFT markets are volatile and subject to rapid, unpredictable changes. External economic, technological, or market factors—such as shifts in user adoption, competitive projects, or general crypto market conditions—may impact the utility, demand, or value of Crypton Hero tokens and NFTs.

Taxation Statement

The tax treatment of transactions involving Crypton Hero tokens, NFTs, or use of the platform may vary according to individual circumstances and jurisdictional laws. Crypton Hero does not provide tax advice, and participants are solely responsible for determining and fulfilling their tax obligations, including but not limited to income, capital gains, sales, use, value-added, or other applicable taxes arising from their activities on the platform. Participants are strongly encouraged to consult with their own tax advisors regarding the appropriate tax treatment of their transactions.

Limitation of Liability

To the fullest extent permitted by applicable law, Crypton Hero, its affiliates, team members, and partners shall not be liable for any direct, indirect, incidental, consequential, special, punitive, or exemplary damages, including but not limited to loss of profits, data, use, goodwill, or other intangible losses, arising out of or in connection with participation in the platform, the use or inability to use Crypton Hero tokens or NFTs, or reliance on any information provided in this White Paper or through the platform, regardless of the basis of liability and even if advised of the possibility of such damages.

Indemnification

By participating in the Crypton Hero platform or utilizing its tokens or NFTs, participants agree to indemnify, defend, and hold harmless Crypton Hero, its affiliates, team members, and partners from and against any and all claims, losses, damages, liabilities, costs, and expenses (including attorneys' fees) arising from or relating to their violation of these disclaimers, applicable laws, or the rights of any third party.

Right to Amend or Update Disclaimers

Crypton Hero reserves the right to amend, update, or modify these legal disclaimers at any time and in its sole discretion, with or without prior notice. Continued use of the platform or participation in any activities following such amendments constitutes acceptance of the updated disclaimers.

Terms of Service

The following Terms of Service ("Terms") apply to all users of the Crypton Hero platform, including access to and use of its website, features, tokens, NFTs, services, and any related activities. By accessing or participating in the platform, users acknowledge and agree to be legally bound by these Terms, as well as any additional rules, policies, or notices issued by Crypton Hero from time to time. Acceptance of these Terms is a condition of participation; users who do not accept or agree to these Terms may not use the platform or any associated services, tokens, or NFTs.

User Eligibility & Obligations

Participation in the Crypton Hero platform is subject to certain eligibility requirements and user obligations. By accessing or using the platform, users represent and warrant that they meet all requirements set forth in these Terms and agree to comply with all applicable rules, policies, and laws.

Age and Jurisdiction Requirements

Users must be at least eighteen (18) years of age, or the legal age of majority in their jurisdiction, whichever is greater, to access or use the Crypton Hero platform. Access to the platform, tokens, NFTs, or related services is not permitted in any jurisdiction where such use or participation is prohibited by law or regulation. Users are solely responsible for ensuring that their participation is lawful in their respective jurisdictions.

KYC/AML Compliance

Users may be required to complete identity verification, Know Your Customer (KYC), and Anti-Money Laundering (AML) procedures prior to accessing certain features, purchasing tokens, or participating in platform activities. By using the platform, users agree to provide accurate, complete, and up-to-date information as requested, and to promptly update such information if circumstances change. Crypton Hero reserves the right to restrict, suspend, or terminate access to the platform if a user fails to satisfy applicable KYC/AML requirements.

User Representations & Warranties

By participating in the platform, users represent and warrant that they: (a) are eligible under these Terms; (b) are not subject to any legal or regulatory restriction that would make their participation unlawful; (c) are acting on their own behalf and not as an agent or representative of a third party; and (d) will comply with all applicable laws, rules, and regulations in connection with their use of the platform, tokens, and NFTs.

Prohibited Activities

Users agree not to engage in any activities that are illegal, fraudulent, abusive, harmful, or otherwise prohibited by these Terms or applicable law while using the Crypton Hero platform. Prohibited activities include, but are not limited to: unauthorized access to the platform or its systems; attempting to interfere with or disrupt the operation of the platform; transmitting viruses or other harmful code; impersonating any person or entity; violating the intellectual property or privacy rights of others; engaging in money laundering, terrorist financing, or other unlawful financial activities; or using the platform for any purpose not expressly authorized by Crypton Hero.

Intellectual Property Rights

All content, trademarks, logos, software, and other intellectual property associated with the Crypton Hero platform are the exclusive property of Crypton Hero or its licensors. Users are granted a limited, non-exclusive, non-transferable right to access and use the platform and its content solely for permitted purposes, subject to these Terms. No user may copy, reproduce, distribute, modify, or create derivative works from any part of the platform or its content without prior written consent from Crypton Hero.

Privacy & Data Protection

By using the Crypton Hero platform, users acknowledge and agree to the collection, use, and processing of personal data as described in the platform's Privacy Policy. Crypton Hero is committed to protecting user privacy in accordance with applicable data protection laws. Users consent to the processing of their information for the purposes of operating and improving the platform, and are encouraged to review the full Privacy Policy for additional details.

Termination and Suspension of Access

Crypton Hero reserves the right to suspend, restrict, or terminate any user's access to the platform, tokens, NFTs, or related services at its sole discretion, with or without notice, for any reason—including, but not limited to, violations of these Terms, applicable law, or the rights of others. Upon termination, all rights granted to the user shall immediately cease.

Governing Law & Dispute Resolution

These Terms, and any disputes arising out of or relating to the Crypton Hero platform, shall be governed by and construed in accordance with the laws of the State of Wyoming, without regard to its conflict of law provisions. Any disputes or claims shall be resolved through binding arbitration or in the courts located in Wyoming, as determined by Crypton Hero, except where otherwise required by law.

Forward-Looking Statements

The Crypton Hero White Paper, related materials, and platform communications may contain forward-looking statements regarding the project's plans, strategies, goals, developments, and anticipated future events. These statements are based on current expectations and projections about future operations, which are inherently subject to risks, uncertainties, and assumptions that may cause actual results to differ materially from those expressed or implied. All participants are cautioned not to place undue reliance on forward-looking statements and are encouraged to review the risk factors and disclaimers set forth in this White Paper.

Nature and Scope of Forward-Looking Statements

Forward-looking statements in this White Paper and related materials may include, but are not limited to, statements concerning anticipated project developments, business strategies, product features, future operations, financial performance, expected partnerships, timelines, and goals. Such statements reflect current views and expectations, but are not promises or guarantees of future performance or outcomes.

No Obligation to Update Forward-Looking Information

Crypton Hero expressly disclaims any obligation or undertaking to update, revise, or correct any forward-looking statements contained in this White Paper or related communications, whether as a result of new information, future events, or otherwise, except as may be required by applicable law.

Caution Regarding Reliance on Forward-Looking Statements

Participants and readers are cautioned not to place undue reliance on forward-looking statements. Actual results and future events may differ materially from those anticipated in such statements due to various risks, uncertainties, and other factors described in this White Paper and elsewhere.
